1 OCTOBER 1982

REVISION 3 1 APRIL 1985

TEMPORARY REVISION NUMBER 1

DATED 3 October 1994

MANUAL TITLE Model 421C Illustrated Parts Catalog (1976 thru 1985)

MANUAL NUMBER - PAPER COPY P654-3-12 AEROFICHE P654-3-12AF

TEMPORARY REVISION NUMBER - PAPER COPY P654-3TR1-12 AEROFICHE N/A

MANUAL DATE 1 OCTOBER 1982 REVISION NUMBER 3 DATE 1 APRIL 1985

This Temporary Revision consists of the following pages, which affect and replace existing pages in the paper copy manual and supersede aerofiche information.

CHAPTER	PAGE	FICHE/FRAME
07-00	PAGE 4	3 D19

REASON FOR TEMPORARY REVISION

Added Tach Generator Heatshield and Clamp part numbers.

FILING INSTRUCTIONS FOR THIS TEMPORARY REVISION

For paper publications:

File this cover sheet behind the publication's title page to identify the inclusion of the Temporary Revision into the manual. Insert the new pages into the publication at the appropiate location(s) and remove and discard the superseded pages.

For aerofiche publications:

Draw a line through any aerofiche frame (page) affected by the Temporary Revision with a permanent red ink marker. This will be a visual identifier that the information in the frame (page) is no longer valid and the Temporary Revision should be referenced. For 'Added' pages in a Temporary Revision, draw a vertical line between the applicable frames which is wide enough to show on the edges of the pages. Temporary Revisions should be collected and maintained in a notebook near the aerofiche library for quick reference.

INTRODUCTION

PURPOSE

The purpose of this technical manual is to illustrate and identify replacement parts and assemblies necessary for the support of the models covered herein. The information in this catalog is based on data available at the time of publication. DO NOT USE this technical manual to determine removal and installation procedures. Refer to the applicable Service Manual.

EFFECTIVITY

Airplane effectivity is indicated in the detailed parts list by a ten-character, alpha-numeric code. The first five characters indicate the first applicability and the last five characters indicate the last applicability on an unbroken sequence of assigned airplanes. When an item is applicable to all airplanes covered by the catalog, the column should be left blank.

AEROFICHE

This catalog has been designed for Aerofiche presentation. To facilitate the use of the catalog for Aerofiche, fiche and frame numbers have been added to the alphebetical and numerical indexes. Frame numbers appear at the bottom center of each page. Refer to the header of the applicable fiche for location of various indexing information.

ALPHA/NUMERIC INDEX

Part numbers in the alpha/numeric index are arranged in order according to the extreme left digit, then the next digit to the right, etc. The digits are used in the following sequence: Space, decimal, slash (/), symbols (such as #), letters of the alphabet, then numbers in numerical order.

The Alpha/numeric Index is a complete listing of all parts included in the Detailed Parts List and shown all information relative to superseded parts. When a part is superseded for all effectivity at a specific location, both the superseding and superseded parts will be listed. The superseded part number will be listed with the note WEU or FSO the superseding part number.

GENERAL SYSTEM OF ASSEMBLY ORDER

The indention system used in the detailed parts list of this catalog shows the relationship of one part to another. For a given item, the indention code shows a system, installation or general heading starting in the extreme left position continuing on down into succeeding columns until the end detail is reached as follows:

1 2 3 4 5 6 7

Installation

- Detail Parts for Installation
- Assembly
- Attaching Parts for Assembly
  - Detail Parts for Assembly
  - Sub-Assembly
  - Attaching Parts for Sub-Assembly
    - Detail Parts for Sub-Assembly
    - Sub-Sub Assembly
    - Attaching Parts for Sub-Sub Assembly
      - Detail Parts for Sub-Sub Assembly

CATALOG BREAKDOWN

This Illustrated Parts Catalog is divided into 15 chapters which correspond to equivalent chapters in the Service Manual. Because Chapter 2 - Inspection and Servicing, and Chapter 15 - Structural Repair are not applicable to the Illustrated Parts Catalog, they are not included in this catalog.

EFFECTIVITY PAGE

A List of Effectivity Pages is provided in the front of the manual. All pages in the manual are listed in sequence on the Effectivity Page with the most recent revision date for each page. A revised List of Effectivity Pages is provided for every Illustrated Parts Catalog revision.

ELECTRICAL ITEMS

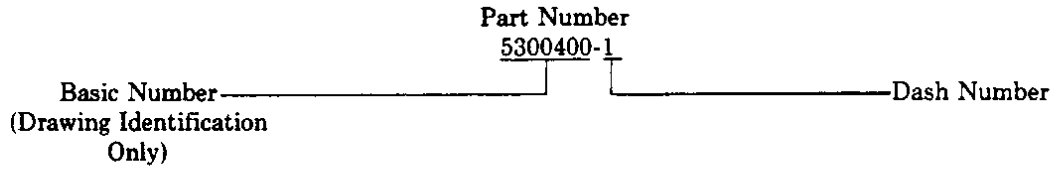
The Illustrated Parts Catalog include all electrical items as listed below:

- Actuators
- Antennas
- Batteries
- Black Boxes
- Circuit Breakers
- Clocks
- Electroluminescent Panels
- Fuel Sensor
- Generators
- Heaters
- Instruments
- Junction Boxes
- Motors
- Pumps
- Relays
- Solenoids
- Starters
- Switches
- Valves
- Wire Bundle Assemblies (No Breakdown)

CESSNA PART NUMBERING SYSTEM

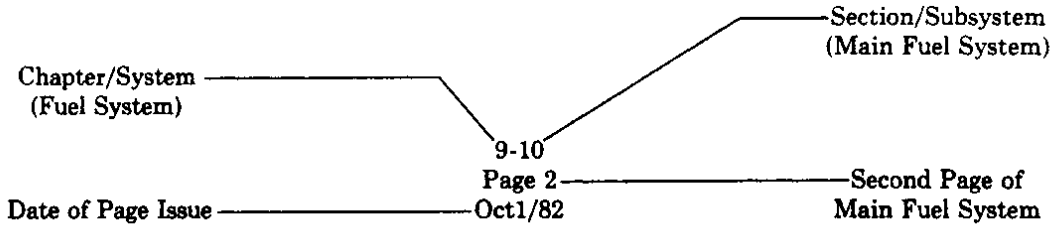
The basic number identifies the Cessna drawing only. Each Installation, Assembly or Detail Part is assigned a part number which consists of the drawing number and an appropriate dash number.

EXAMPLE:



PAGE NUMBERING SYSTEM

The Page Numbering System used in the Illustrated Parts Catalog consists of two-element numbers separated by a dash, under which the page number and date are printed.



STANDARD PARTS

Many parts having standard usage have been incorporated into the Cessna Standard System. Parts in this group are designated with the part number prefix "S[, "CM[or "C[.

For standard hardware items such as screws, nuts, clamps, etc., AN, NAS, MS and AF standard numbers are listed.

BULK ITEMS

Certain items such as flexible air hose, rubber moldings and channels, windshield sealing strips, etc., are noted in the catalog listings as bulk items. These listings also note the cut length of these materials for one installation.

When an item is listed as a bulk item, it will be supplied to the dealer in the most convenient bulk length or quantity. Reference to the cut length or quantity per installation provides for the most satisfactory disbursement to the customer.

PART NUMBER COLUMN

This column contains the part number used to identify the item.

NOMENCLATURE COLUMN

The relationship of the items listed is shown by the degree of indention of each item. For example: the wing installation is listed in Column 1 of the nomenclature column. The fillet assembly is the next lower assembly and is therefore listed in Column 2.

If two or more assemblies contain a majority of identical parts or if the assemblies are left or right, the assemblies are listed together and the next lower assemblies or detail parts are listed as common for both assemblies with the differing parts coded for usage on the correct assembly.

Attaching parts are listed immediately beneath the item to be attached and preceding any detail parts of the item. They are listed in the same indention as the item they attach and are preceded by the caption "At-

taching Parts. The end of the attaching parts listing is followed by a separating symbol ---*---. Component parts of the complete airplane which are not included in any assembly, but which are used in conjunction with, or attach to certain assemblies, are listed either preceding the first detail or following the last detail of the assembly or installation and in the same indent as the major assembly or installation.

UNITS PER ASSEMBLY COLUMN

The quantities listed in the units per assembly column are the quantity used per figure. The quantity listed for attaching parts denotes the quantity necessary to attach only one item. The total quantity necessary to attach more than one item may be obtained by multiplying the quantity of attaching parts by the number of items to be attached.

SERIAL, COLOR AND CORROSION PROOFING

Be sure to indicate model and serial number of the airplane. Serial number is very important to properly identify parts used on each airplane.

When color, upholstery material, Royalite or interior trim are involved, include the complete finish and trim plate number. See the Finish and Trim Plate information for an example of the numbers to be supplied. Part numbers, used to identify these parts, are not complete without the finish and trim numbers.

If corrosion proofing is desired, add the letter "CP[following the part number and be sure to indicate model and serial number of the airplane. Serial number is very important to properly identify parts used on each airplane.

When stainless steel control cables are desired, use the designated part number for the standard cable and add the letters "CR[following it.

SYMBOLS AND PART NUMBER TERMS

A blank entry in the part number column appears before an unprocurable part or installation which is also denoted in the "Units per Assembly[column by the use of the symbol NP.

See Figure - when the term "SEE FIG ---[, appears in the nomenclature Column and the units per assembly column indicate "RF[, the figure referred to will be the next highest assembly of the referred item. If the units per assembly column show a quantity, the figure referred to will be the breakdown.

Deleted - Not Used - when the term "DELETED - NOT USED[, appears in the nomenclature column, it signifies that the index number was used but is no longer required.

ABBREVIATIONS

AC	alternating current

WEU	when exhausted use
WL	water line
WS	wing station

HOW TO ORDER

USE YOUR CATALOG TO ORDER PARTS (See How To Use Pages). Use Parts and accessories Order Form Number P-312-12 to be supplied by Cessna on request. Give complete information on addresses and make sure the part number and part name are as shown in the catalog. Be sure to specify quantities. Specify how the order is to be shipped; otherwise, it will be sent out in the manner that seems best to the shipper.

DISTRIBUTOR ORDERS

Distributors will place all orders with the Cessna Supply Division with instructions as to the shipping destination. The factory prefers not to make C.O.D. shipments for the distributor and all billing will be made to the distributor in the case of direct shipments.

DEALER ORDERS

Dealers will place all of their parts order requirements with their distributor. The factory will not honor orders received directly from a dealer. It will be necessary for us to forward it to the distributor for his action. Therefore, dealer orders sent directly to the distributor will result in much faster delivery on any parts that are required.

RETAIL ORDERS

Retail customers are to submit orders through a Cessna dealer in their area. Orders received directly by the Supply Division will be forwarded to the dealer from whose area it was received. Considerable savings in time will result to the customer if orders are placed with a local Cessna dealer.

Cessna Aircraft Company reserves the right to cancel, add or change the parts and assemblies as described in this catalog without notice.

SERVICE LETTERS, SERVICE BULLETINS AND SERVICE KITS

A record of Service Letters, Service Bulletins and Service Kits prepared for the airplane is listed on the Service Letter, Service Bulletin and Service Kit list page.

The Service Letters, Service Bulletins and Service kits list utilizes four columns to summarize service letter, service bulletin and service kit information.

Service Letter, Service Bulletin and Service Kit Numbers - The Reference Data column identifies the service letter, service bulletin and service kit by number. Service letters, service bulletins and service kits are numbered consecutively.

Service Letter, Service Bulletin Service Kit Date - The Issue Date column indicates the date the service letter, service bulletin and service kit displays.

Title - The Title column identifies the service letter, service bulletin and service kit by nomenclature. It is the same title displayed on page one of the service letter, service bulletin and service kit.

Catalog Incorporation Date - The Incorporation Date column will indicate the status of the service letter, service bulletin and service kit.

Date: if date appears in the column, this indicates the service letter, service bulletin and service kit information is incorporated into the catalog.

Not Applicable: if not applicable appears in the column, this indicates the service letter, service bulletin and service kit does not affect the catalog.

Other self-explanatory statements may appear in this column (i.e. , replaces, replaced, superseded, etc.).

DEFINITION OF TEXT PAGE INFORMATION

1. The figure number refers to the corresponding illustration.
2. The number in the Figure and Item Number column corresponds to the item number on the part in the corresponding illustration.
3. Attaching parts are listed immediately following the part(s) attached. A symbol ---*--- follows the last item of the attaching parts.

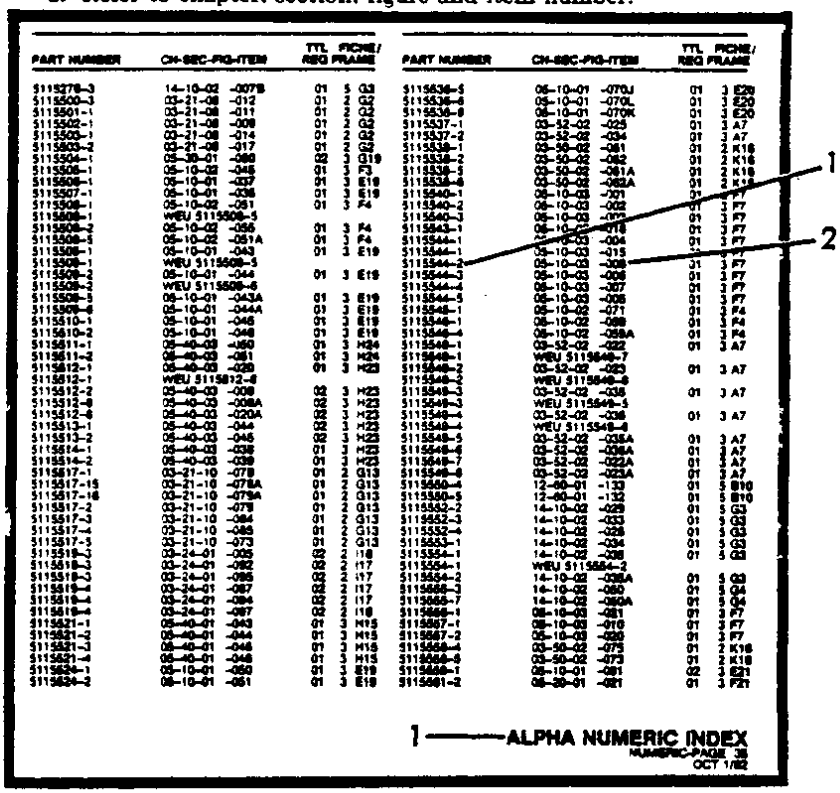
- ITEM NOT ILLUSTRATED

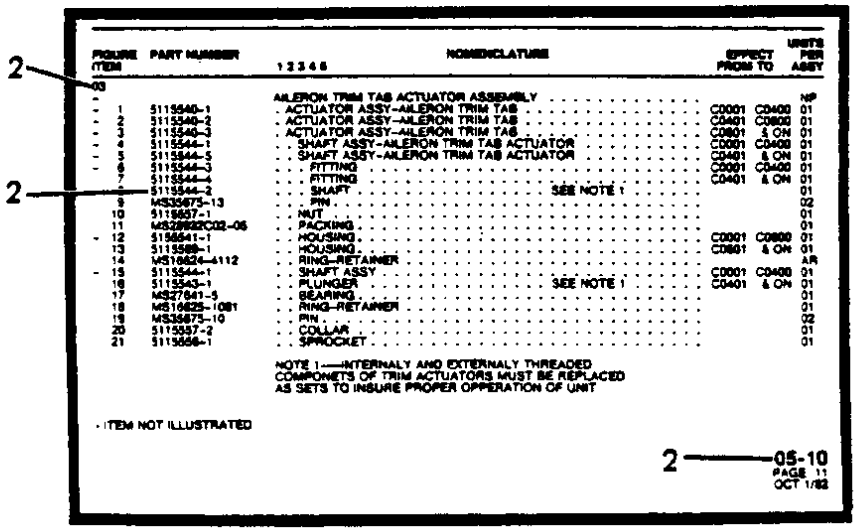
SAMPLE PAGE

4. Parts with the item number preceded by a dash are illustrated, but not indexed on the illustration.
5. A vendors part number is identified by the vendors part number in the Part Number column and the Federal Supply vendor code following the nomenclature in the Nomenclature column.
6. A number in the Units per Assembly column indicates the quantity of the part used per next higher assembly or installation.
7. Numbers in the Effectivity column indicate usage of the part is restricted. For example, the numbers 0001 0024 indicate that the part is used on airplanes 1 thru 24.
8. This cross-reference indicates the figure in which the installation or assembly is broken down to its component parts.
9. A small number located in the right lower corner of the illustration page is used for production of the catalog, and is not applicable to the usage of the catalog.
10. Parts used in the quantity "as required[are indicated by "AR[in the Units per Assembly column. All parts having Units per Assembly of 100 or more will carry the "AR[listing.
11. Alternate part numbers are listed immediately following the part for which they may be substituted. The entry "ALT. FOR ----[will be in the Nomenclature column.
12. A "USED ON[or "USED WITH[note in the nomenclature column indicates the proper next higher assembly of a part when the part is not common to all of the next higher assemblies listed preceding the part.
13. Parts used only on a left or right installation or assembly are designated by "LH[or "RH[in the Nomenclature column.
14. "RF[indicates the installation or assembly is listed again in the figure cross-reference in the Nomenclature column. The Units per Assembly is given in the referenced figure.
15. The letter "R[in the right margin indicates text added or revised by the latest catalog revision.

HOW TO USE CATALOG IF PART NUMBER IS KNOWN

1. Find the part number in the Alpha Numeric Index.
2. Refer to chapter, section, figure and item number.





SAMPLE PAGE

HOW TO USE CATALOG IF PART NUMBER IS KNOWN

3. Turn to chapter, section and figure.
4. Locate part on illustration and in parts list by item number.

421C0001 THRU 421C0600

FILLING INSTRUCTIONS
1. TO DEFLATE-LOOSEN VALVE BODY (2½ TURNS MAXIMUM).
2. WITH STRUT FULLY COMPRESSED, REMOVE VALVE & FILL WITH HYD FLUID/ MIL-H-5606.
3. STROKE STRUT SLOWLY (3) TIMES (MINIMUM).
4. TOP OFF FLUID WITH STRUT COMPRESSED.
5. REPLACE AIR VALVE AND INFLATE STRUT TO 65 PSIG WITH WHEEL CLEAR OF GROUND. (1.37 IN. STRUT EXTENSION ON GROUND, EMPTY EXCEPT FULL OF FUEL AND OIL.)

26*
421C0001 THRU 421C0800

CAUTION
SEE CESSNA PUBLISHED SERVICE MANUAL FOR LANDING GEAR RIGGING INSTRUCTIONS

27

FILLING INSTRUCTIONS
1. TO DEFLATE—LOOSEN VALVE BODY (2½ TURNS MAXIMUM)
2. WITH STRUT FULLY COMPRESSED, REMOVE VALVE & FILL WITH HYD. FLUID/MIL-H-5606.
3. STROKE STRUT SLOWLY (3) TIMES (MIN)
4. TOP OFF FLUID WITH STRUT COMPRESSED.
5. REPLACE AIR VALVE & INFLATE TO 275 PSIG, WHEEL CLEAR OF GROUND (2.70 IN. EXTENSION ON GROUND, EMPTY EXCEPT FULL OF FUEL AND OIL.)

28*
421C0001 THRU 421C0800

MAXIMUM BAGGAGE ALLOWANCE
400 POUNDS (200 POUNDS/SIDE)
FOR AIRPLANE LOADING SEE WEIGHT & BALANCE DATA IN THE PILOT'S OPERATING HANDBOOK

30*

MAX BAGGAGE 200 LBS

31

MAX BAGGAGE 40 LBS

29*

MAXIMUM BAGGAGE ALLOWANCE
100 POUNDS (50 POUNDS/SIDE)
FOR AIRPLANE LOADING SEE WEIGHT & BALANCE DATA IN THE PILOT'S OPERATING HANDBOOK

32*

STATIC SOURCE DRAIN
DO NOT OPEN WHILE PRESSURIZED

33*

TRANSFER LINE DRAIN
DRAIN DAILY

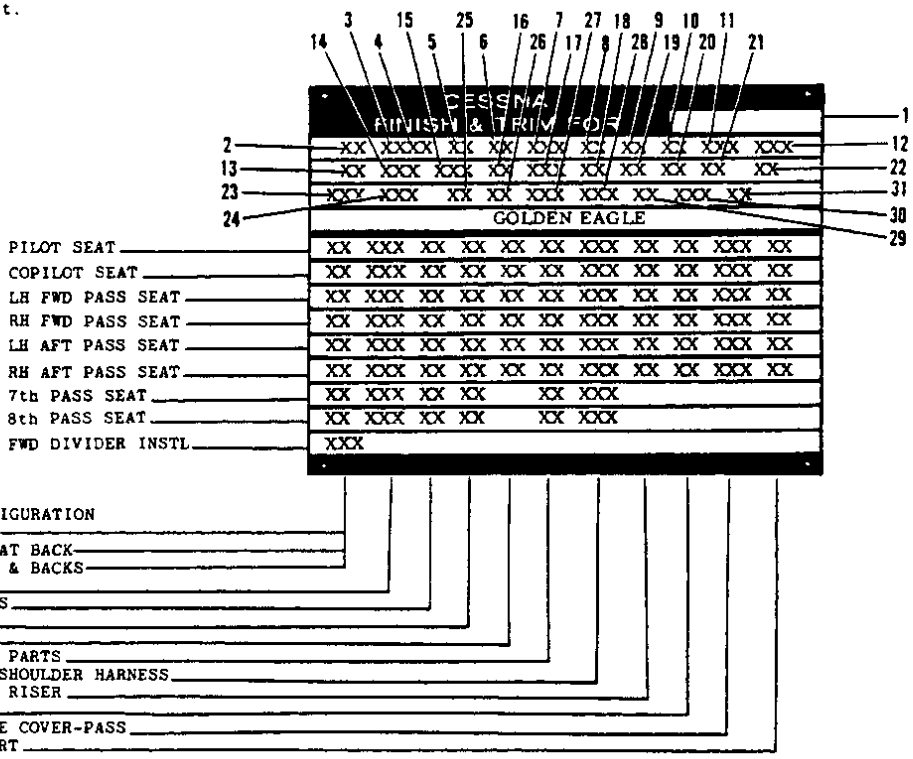
FINISH AND TRIM INFORMATION
421C0001 TO 421C0200

GOLDEN EAGLE

The following finish and trim plate breakdown provides important materials and colors information which is required when ordering replacement interior finish and trim equipment for your aircraft.



1. Aircraft Serial Number
2. Model Year
3. Paint Type
4. Exterior Colors
5. Armrest Cushion-Crew
6. Toilet Inserts
7. Toilet Seams
8. Toilet Bolsters
9. Toilet Risers
10. Toilet Exposed Trim
11. Tissue Holder
12. Toilet Seat
13. Side Panel & Console
14. Armrest Panel-Crew
15. Seat Indicator Tabs
16. Litter Bags
17. Step & Frame Trim End Cover-Cabin Door Cable
18. Exposed Parts-Door
19. Carpet
20. Throw Rug
21. Door Cable Covers
22. Outbd Armrest-Pass
23. Gear Crank Mech Cover
24. Evap Cover-Air Cond
25. Ducts-Air Cond
26. Curtains
27. Entrance Light Cover
28. Std Interior Paint & Mat'l
29. Fwd Blkhd Uphol
30. Cap Strip-Side Wall
31. Seat Support Structure

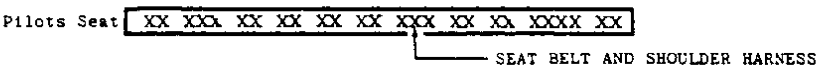
NOTE:
Code "SP" instead of individual code numbers in the finish and trim plate are shown for materials and colors which are not standard. Code "O" instead of individual code number indicate the part is not installed on the aircraft; such as options.

WHAT INFORMATION IS REQUIRED WHEN ORDERING INTERIOR EQUIPMENT:

1. Aircraft Model
2. Aircraft Serial number
3. Basic Part Number (available in applicable Figure)
4. Applicable codes from Finish and Trim Plate of your aircraft

SAMPLE OF HOW TO ORDER PILOTS SEAT BELT:

1. Refer to applicable Figure and obtain Basic Part Number (CM4009).
2. Check the Finish and Trim Plate Codes for material and color information code.



3 Provide the following information on order: (1) Model 421C, (2) Serial 421C0001, (3) CM4009-XX Pilots Seat Belt.

1. Aircraft Model
2. Aircraft Serial number
3. Basic Part Number (available in applicable Figure)
4. Applicable codes from Finish and Trim Plate of your aircraft

SAMPLE OF HOW TO ORDER PILOTS SEAT BELT:

1. Refer to applicable Figure and obtain Basic Part Number (CM4009).
2. Check the Finish and Trim Plate Codes for material and color information code.

Pilots Seat XX XXX XX XX XX XX XXX XX XX XXXX XX

SEAT BELT AND SHOULDER HARNESS

3 Provide the following information on order: (1) Model 421C, (2) Serial 421C0201, (3) CM4009-XX Pilots Seat Belt.

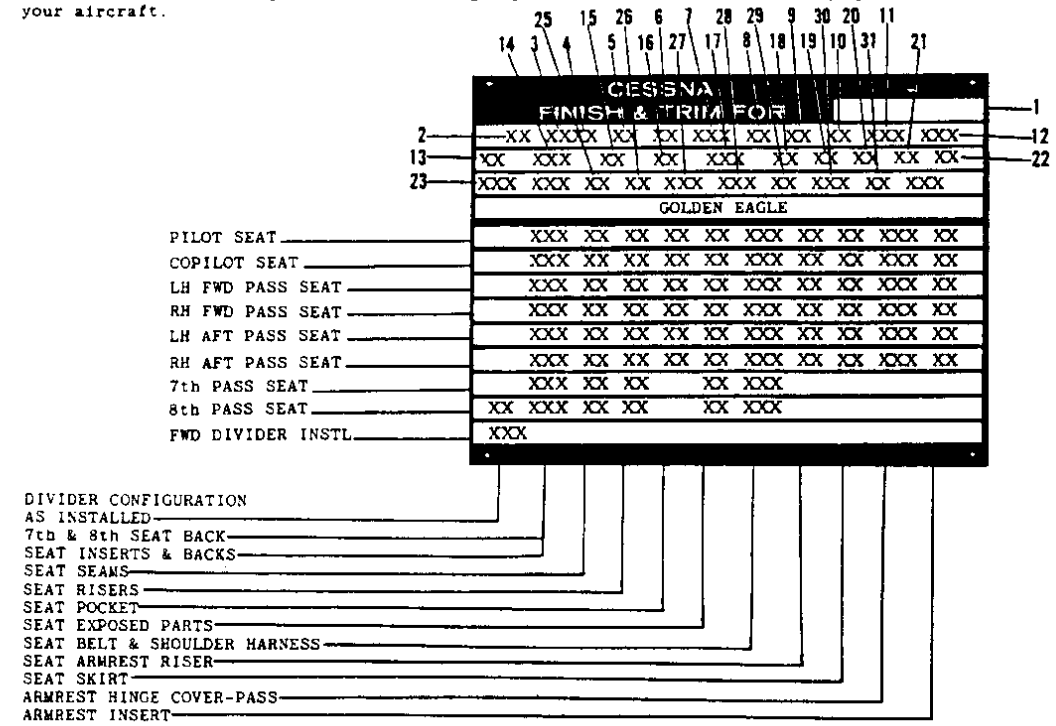
FINISH AND TRIM PLATE
FIGURE 1 (SHEET 2)

FINISH AND TRIM INFORMATION

421C0401 THRU 421C0600

GOLDEN EAGLE

The following finish and trim plate breakdown provides important material and color information which is required when ordering replacement interior and trim equipment for your aircraft.



1. Aircraft Serial Number
2. Model Year
3. Paint Type
4. Exterior Colors
5. Armrest Cushion - Crew
6. Toilet Inserts
7. Toilet Seams
8. Toilet Risers
9. Toilet Exposed Trim
10. Tissue Holder
11. Toilet Seat - Flush
12. Toilet Seat-Dry
13. Side Panel & Console
14. Armrest Panel - Crew
15. Air Grills
16. Litter Bag
    Step & Frame Trim
17. End Cover - Cabin Door Cable
18. Exposed Parts - Door
19. Carpet
20. Throw Rug
21. Door Cable Covers
22. Outbd. Armrest - Pass.
23. Evap. Cover - Air Cond.
24. Ducts - Air Cond.
25. Curtains
26. Entrance Light Cover
27. Std. Interior Paint & Mat'l.
28. Fwd. Bhd. Uphol.
29. Cap Strip Side Wall
30. Seat Support Structure
31. Emergency Exit Cup

NOTE:
Code "SP" instead of individual code numbers in the finish and trim plate are shown for materials and colors which are not standard. Code "O" instead of individual code number indicate the part is not installed on the aircraft; such as options.

WHAT INFORMATION IS REQUIRED WHEN ORDERING INTERIOR EQUIPMENT:

1. Aircraft Model
2. Aircraft Serial number
3. Basic Part Number (available in applicable Figure)
4. Applicable codes from Finish and Trim Plate of your aircraft

SAMPLE OF HOW TO ORDER PILOTS SEAT BELT:

1. Refer to applicable Figure and obtain Basic Part Number (CM4009).
2. Check the Finish and Trim Plate Codes for material and color information code.

890A-2	SEALANT - Liquid	Brush Coating
890B-1/2	SEALANT - Filleting	Fay Sealing - Small areas
890B-2	SEALANT - Filleting	Fay Sealing - Small areas

NOTE

Check with Cessna Supply Division for availability and unit of measure before ordering miscellaneous bulk items.

WIRING

The data outlined below provides wiring information required for ordering purposes.

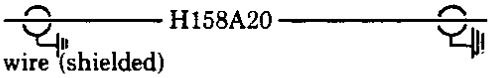
WIRE TYPES AND USES

There are five basic categories of wire used as defined on the wiring diagram. The five categories are listed below with an example of each (as shown on the wiring diagram).

Wire (unshielded).

High temperature wire (unshielded), (wire number is underlined).

Wire (shielded), (shielded wire is shown with split semi-circles).



High temperature wire (shielded)

Color coded wire

WIRE DESIGNATION

Wire types are identified by a combination of letters and numbers that define the wire, number of cables, shield style and material and jacket material. This identification may or may not be embossed on the wire jacket.

Replace wires with the type specified, if defined in the applicable wiring diagram.

When the wire type is not defined in the applicable wiring diagram, the following procedure shall be used to determine wire designation. This wire designation is to be used to order wire for replacement purposes.

Use Table 1 to determine wire designation. The following three items must be known to utilize Table 1.

NOTE

Always use the information from Table 1 to determine wire designation even if the wire being replaced has a different wire designation than that shown. Due to specification changes and superseding wire designation numbers, the wire designation of the wire being replaced may not be in use any longer.

Wire Category (one of five basic categories) - determined by refering to paragraph. Wire Types and Uses.

Wire Gage - determined by refering to the wire identification number on the wiring diagram. Example, H158A20 - wire gage is 20.

Number of Conductors - determined by refering to the wiring diagram.

NOTE

Most of the wires used are single (1) conductor.

WIRE CATEGORY

			Gage		Number of Conductors		
1. Wire (Unshielded):	M27500 -	□□		ML	□	U00	12-25 Gage only
	M27500 -	□□		MH	□	U00	10 Gage only
	M27500 -	□□		B	□	U00	Less than 10 Gage

Example: H158A20 Wire, Single Conductor has a Wire Designation of M27500-20ML1U08.

		Gage		Number of Conductors	
2. High Temperature Wire (Unshielded)	M27500 -	□□	TA	□	U06

Example: H158A20 Wire, Single Conductor (Shown Underlined on the Drawing) has a Wire Designation of M27500-20TA1U06.

		Gage		Number of Conductors	
3. Wire (Shielded)	M27500 -	□□	B	□	T08

Example: H158A20 Wire, Single Conductor (Shown with Shielding on the Drawing) has a wire Designation of M27500-20B1T08.

Table I. Wire Designation Table (Sheet 1)

4. High Temperature Wire (Shielded)	M27500 -	Gage □□		TA	□	Number of Conductors N06

Example: H158A20 Wire, Single Conductor (Shown Underlined and with Shielding on the Drawing) has a Wire Designation of M27500-20TAIN06.

5. Color Coded Wire (Shielded)	M16878E	Gage □□	Color □□□□□□□

Example: Red 20 GA wire has a Designation of M16878E20RED

Possible Colors:

Blue	Orange
Brown	Yellow
Black	Wht Blk
Red	Wht Red
Green	

Table I. Wire Designation Table (Sheet 2)

ABS/FIBERGLASS KIT LISTS

The following list provides part numbers and description/size for ABS/FIBERGLASS Kit used to repair cracks in ABS, PBC, PVPC, graphite and fiberglass material.

Part Number	Description/Size
51543	Repair Kit, 1 Ounce
51544	Repair Kit, 2 Ounce
51545	Repair Kit, 3 Ounce
51546	Repair Kit, 4 Ounce
51547	Repair Kit, 5 Ounce
51548	Repair Kit, 6 Ounce

NOTE

The one ounce kit will fix a crack approximately 18 inches long, the two ounce 36 inches, three ounce 54 inches, etc. The kit includes everything needed to repair cracks except paint or dye to match original color.

Kits include the following parts, quantity and size varies with size of kit ordered. The following parts are also available for individual purchase.

Part Number	Description
104	Syringe
115	Filler Dust
72566	Perma Bond-1 oz.
112576	Gloves
112577	Finger Cots
112578	Jars
112579	Sprayer
112580	Sandpaper Units
112680	Texture-Cloud Gray
112681	Fiberglass Mat
