INTRODUCTION

INTRODUCTION

PURPOSE

The purpose of this technical manual is to illustrate and identify replacement parts and assemblies necessary for the support of the 421 aircraft. DO NOT USE this technical manual to determine removal and installation procedures. Refer to the applicable 421 Service Manual.

GENERAL

This illustrated parts catalog has been prepared by the electromatic accounting machine process and provides quick and easy identification of parts and assemblies of the Cessna Aircraft covered in this catalog.

SERIAL LISTINGS

The Model 421 Serials are as follows:

1968 - 421-0001 To 421A0001
1969 - 421A0001 To 421B0001
1970 - 421B0001 Thru 421B0100
1971 - 421B0101 Thru 421B0200
1972 - 421B0201 Thru 421B0300
1973 - 421B0301 Thru 421B0500
1974 - 421B0501 Thru 421B0800
1975 - 421B0801 & On

This catalog is divided into section as follows:

Section I - Introduction
Alphabetical Index
How to Use This Book
Section II
Part 1 - Airplane Assembly
Part 2 - Electronics
Section III - Numerical Index

STANDARD PARTS

Many parts having standard usage have been incorporated into the Cessna Standard System. Parts in this group are designated with the part number prefix "S", "CM" or "C".

For standard hardware items such as screws, nuts, clamps, etc., AN, NAS, MS and AF standard numbers are listed.

NON-INTERCHANGABLE PARTS

When a part of later design is not interchangeable with the part it replaces, both parts applicable to the particular usage are listed. The individual part usage is listed in the usable on code column. Care should be exercised in determining proper serial effectivity when ordering to insure receipt of the correct part.

INTERCHANGEABLE PARTS

When a part of later design is completely interchangeable with the part it replaces, both parts will be serialized and the notation "WEU" (when exhausted use) or "FSO" (for spares order) will be entered following the listing of the earlier design part. "WEU" means that the earlier design part should be used on airplanes to which they apply until the supply of these parts is exhausted --- after which time the later design part must be used. This is done to simplify stocking of parts by our distributors and dealers. "FSO" means that the earlier designed part cannot be ordered for this application, order the later design part. The later part is as good, physically and functionally, as the earlier design part, or better --- the difference being the later design part can be used on more than one block of airplane serials.

BULK ITEMS

Certain items such as flexible air hose, rubber mouldings and channels, windshield sealing strips, etc., are noted in the catalog listing as bulk items. When an item is listed as a bulk item, it will be supplied to the dealer in the most convenient bulk length or quantity. A miscellaneous bulk item tabular listing appears in Section I.

SECTION II

This section lists all replaceable items in the airplane, which are detailed on illustrations throughout the section. The index numbers on the illustration are keyed to the list of parts and assemblies on each figure. The purpose of the index number is to provide complete and positive identification of the article, but should not be used for procurement purposes. All higher assembly or installation figures list a quantity for all lower assembly or installation figures that are required to complete that group, system, installation or assembly. All groups or systems are complete whether entries are required or referenced. In addition each illustration contains a listing of each "See Fig" entry in that figure.

a. FIGURE AND INDEX COLUMN. The figure number is listed once at the beginning of the text list followed by a dash and the indexed number. The remaining index numbers are preceded by only a dash.

b. PART NUMBER COLUMN. This column contains the part number used to identify the item.

c. DESCRIPTION COLUMN. The relationship of the items listed is shown by the degree of indention of each item, for example: the wing installation is listed in column 1 of the description column. The fillet assembly is the next lower assembly and is therefore listed in column 2.

If two or more assemblies contain a majority of identical parts or if the assemblies are left or right hand, the assemblies are listed together and the next lower assemblies or detail parts are listed as common for both assemblies, with the differing parts coded for usage on the correct assembly.

Attaching parts are listed immediately beneath the item to be attached and preceding any detail parts of the item. They are listed in the same idention as the item they attach and are preceded by the caption

"Attaching Parts". The end of the attaching parts listing is followed by a separating symbol ---*---.

Component parts of the complete airplane which are not included in any assembly, but which are used in conjunction with, or attach to certain assemblies, are listed either preceding the first detail or following the last detail of the assembly or installation, and in the same indent as the major assembly or installation.

d. UNITS PER ASSEMBLY COLUMN. The quantities listed in the units per assembly column are the quantity used per figure. The quantity listed for attaching parts denotes the quantity necessary to attach only one item. The total quantity necessary to attach more than one item may be obtained by multiplying the quantity of attaching parts by the number of items to be attached.

e. USABLE OF CODE COLUMN. The letter symbols appearing in this column identify parts which have limited aircraft serial effectivity. Where no symbol appears, the parts listed apply to all aircraft unless the parts are components of a serialized installation or assembly. A list of codes and their related serial effectivity appears at the end of the text of each applicable figure. Serial numbers appear in bold type at the top of each illustration and first page of text of figures which have limited serial effectivity.

SECTION III

Part numbers in the numerical index are first arranged in order according to the extreme left hand digit, then the next digit to the right, etc. The digits are used in the following sequence: Space, decimal, slash (/), symbols (such as #), letters of the alphabet, then numbers in numerical order.

SYMBOLS AND PART NUMBER TERMS

A blank entry in the part number column appears before an unprocurable part or installation.

See Figure - When the term "SEE FIG ---", appears in the part number column and the units per assy column indicates "REF", the figure referred to will be the next higher assembly of the referred item. If the units per assy column shows a quantity, the figure referred to will be the breakdown.

Deleted Not Used - When the term "DELETED - NOT USED", appears in the description column, it signifies that the index number was used but is no longer required.

ALT - The abbreviation "ALT" following the nomenclature of an item is used to denote an alternate part.

LH & RH - The abbreviations "LH or RH" are used following the part nomenclature to denote either left hand or right hand parts of the next higher assembly.

Other abbreviations spaced apart from and following the part nomenclature are for cataloging and manufacturing purposes and are not to be considered by the customer.

AR - The abbreviation "AR" appearing in the units per assy column denotes "As Required" and is used to indicate bulk quantity where an indefinite amount is used.

NP - the abbreviation "NP" appearing in the units per assy column denotes the item is not procurable.

ABBREVIATIONS COMMONLY USED

ALT - Alternate
& - And
AR - As required
ASSY - Assembly
BHD - Bulkhead
BKI - Bulk item
CKT BKR - Circuit Breaker
COMPN - Components
CTR - Center
CU FT - Cubic Foot
ELEC - Electric
EQUIP - Equipment
FIG - Figure
FSO - For spares order
FT - Foot or Feet
FUS - Fuselage
FWD - Forward
GAL - Gallon
IN - Inch
INBD - Inboard
IND - Indicator
INSTL - Installation
LB - Pound
LH - Left hand
LWR - Lower
NP - Not procurable
OBS - Obsolete
OUTBD - Outboard
PKG - Package
PN - Part Number
PT - Pint
QT - Quart
REF - Reference
RH - Right hand
STA - Station
SYS - System or Systems
UPR - Upper
VAC - Vacuum
WEU - When exhausted use

SERIAL, COLOR AND CORROSION PROOFING

Be sure to indicate model and serial number of the airplane. Serial number is very important to properly identify parts used on each airplane.

When color, upholstery material, royalite or interior trim is involved, include the complete finish and trim plate number. When color, upholstery material or royalite trim for seats is involved, include the complete seat upholstery plate number. See the Finish and Trim Plate information for an example of the numbers to be supplied. Part numbers used to identify these parts are not complete without the finish and trim numbers. These parts are noted in Section II, Part 1 with the symbol @ or a combination of this symbol.

If corrosion proofing is required, add the letters "CP" following the part number.

When stainless steel control cables are desired, use the designated part number for the standard cable and add the letters "CR" following it.

HOW TO ORDER

USE YOUR CATALOG TO ORDER PARTS (See How To Use Pages). Use Parts and Accessories Order Form Number P-312-12 to be supplied by Cessna on request. Give complete information on addresses

and make sure the part number and part name are as shown in the catalog. Be sure to specify quantities. Specify how the order is to be shipped, otherwise, it will be sent out in the manner that seems best to the shipper.

All parts in the pressurization cell that must be sealed on installation are noted with the % symbol following the part number, see the bulk item listing in the introduction for the sealants and packaging offered.

DISTRIBUTOR ORDERS

Distributors will send all orders to the factory with instructions as to the shipping destination. The factory prefers not to make C. O. D. shipments for the distributor and all billing will be made to the distributor in the case of direct shipments.

DEALER ORDERS

Dealers will place all of their part order requirements with their distributor. The factory will not honor orders received directly from a dealer. It will be necessary for us to forward it to the distributor for his action. Therefore, dealers orders sent direct to the distributor will result in much faster delivery on any parts that are required.

RETAIL ORDERS

Retail orders will not be honored by the factory. They are to be placed with the dealer in the owners' territory and when received directly by the factory will be forwarded to the dealer from whose territory it was received. Considerable saving in time will result to the owner if his orders are placed with his dealer.

Cessna®

Cessna Aircraft Company reserves the right to cancel, add or change the parts and assemblies as described in this catalog without notice.

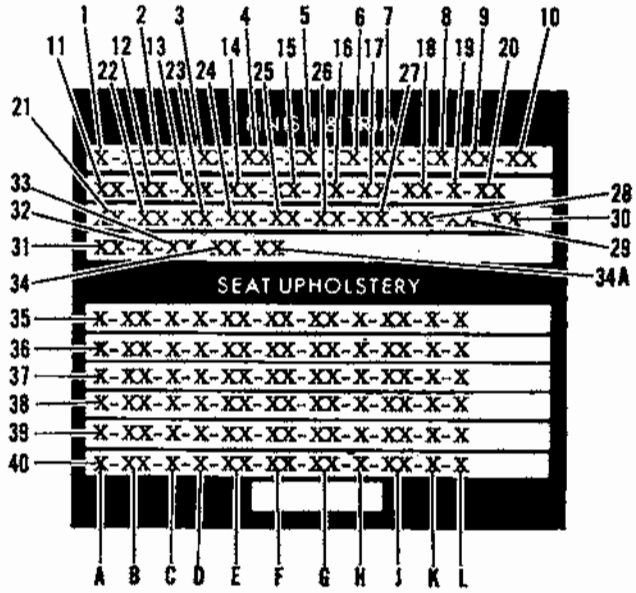
SERVICE KITS.

The following is a list of Service Kits applicable to this Technical Manual. When a Service Kit is initially incorporated into this Technical Manual, information applicable to the change is referenced in the group assembly parts list, and the Service Kit is listed below.

KIT NUMBER	TITLE	CHANGE/REVISION DATE
SK402-20	800 DME Ram Air Cooling	1 April 1970
SK411-45	Doubler, Instl and Access Door - Wing Skin Protection, Instl	1 April 1970
SK411-55	Strap Safety, Fwd Cabin Divider Instl.	1 April 1970
SK421-4	Door Stop Assy, Upper Cabin Door	1 April 1970
SK421-5	Cable Assy Fwd - Lwr Cabin Door	1 April 1970
SK421-6	Fuel Flow Gage Discharge Pressure Line Modification	1 April 1970
SK421-8	Fuel Metering Unit Hose Replacement	1 April 1970
SK421-9	Heat Exchanger Controls, & Valve Instl.	1 July 1969
SK421-10	Oil Separator Shield Assy Instl.	1 April 1970
SK421-12	Gross Weight Requirement	1 April 1970
SK421-13	Fuel Pump - Engine Driven	1 April 1970
SK421-14	Filter, Auxiliary Tank In-Line Fuel Pump, Instl.	1 April 1970
SK421-16	Fuel Injection Line Protection	1 April 1970
SK421-17	Executive Table RH Modification	1 April 1970
SK421-18	Placard Instl., Emergency Exit, Writing Desk and Executive Table	1 April 1970
SK421-20	Autopilot, Nav-O-Matic 800 Modification	1 April 1970
SK421-22	Valve, Manifold Overboost Relief Provision Instl.	1 April 1970
SK421-23	Torque Link Brace Main Landing Gear Modification	1 April 1970
SK421-26	Pump - Fuel Transfer Instl.	1 April 1970
SK421-27	Static Port Modification	1 April 1970
SK421-28	Rudder Stop Instl.	1 April 1970
SK421-30	Sealing Kit - Nose Section	1 April 1970

A "FINISH AND TRIM" plate is installed on the left nose gearwell web adjacent to the M. A. A. Nameplate.

The following diagram is an example showing the sequence and definition of each code symbol on the finish and trim plate.



1. Model Year
2. *Exterior Paint Colors
3. Window, Windshield Trims & Overhead Light Cover

READ THIS BEFORE ORDERING

EXAMPLE OF ORDERING EXTERIOR COLOR CODE LETTER "A" ON FINISH AND TRIM PLATE:

CES1054-170G OR CES2800-2113G
VESTAL WHITE — GALLON
VESTAL WHITE — GALLON

NOTE: When ordering paint specify CES1054- (3 numbers or 1 letter and 2 numbers) or CES 2800- (4 numbers). Add letter "P" (for pint), "Q" (for quart), "G" (for gallon) or "S" (for spray can) to the paint dash No. (see example).

NOTE: All landing gear components including wheel and brakes shall be painted white epoxy CES2800-2212. Except main landing gear retraction torque tube assembly to be painted gull gray baked enamel CES1054-114. Alternate paint for wheel and brake is vestal white lacquer CES1054-398.

NOTE: When ordering bulk items whose unit of measure is pint, quart, or gallon, add the letter P (for pint), Q (for quart), or G (for gallon) to the part numbers.

Example: EC2141PQ = 1 Quart of EC2141P Cement.

When ordering bulk items where a variety of widths is available, add dash number to part number to indicate width wanted.

Example: 181-44 = 181 Glass Fabric, 44 inches wide.

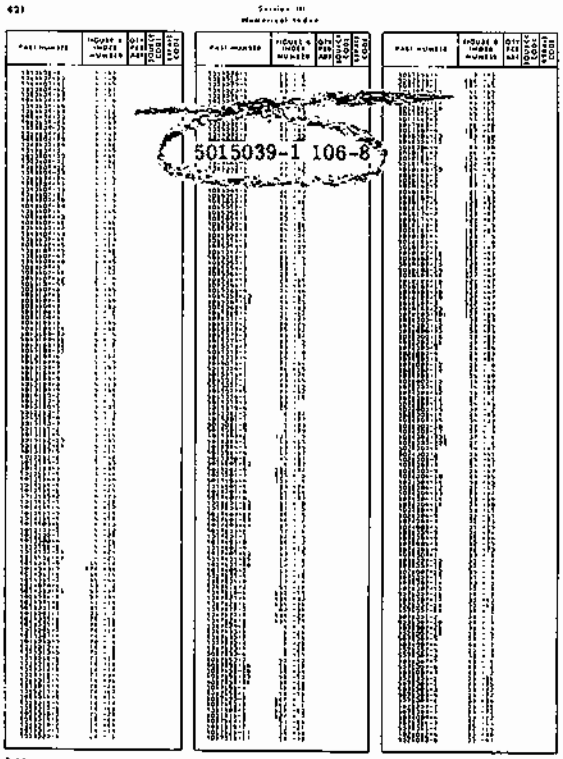
How to use this book.....



NUMERICAL INDEX

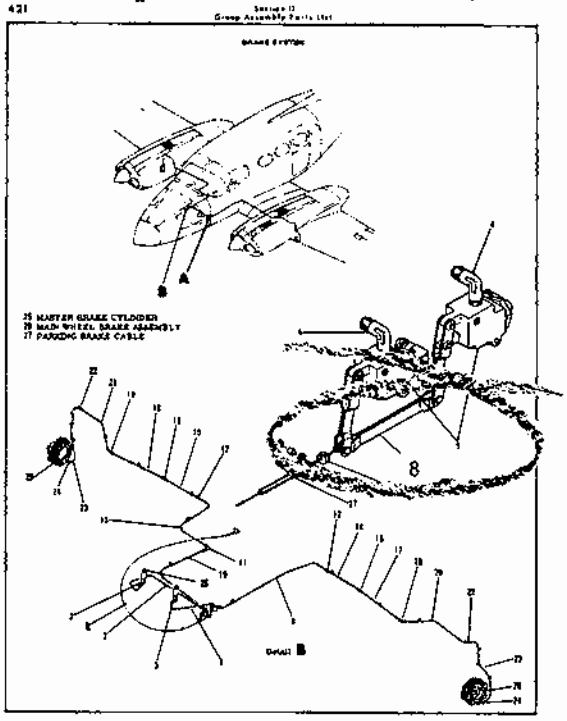
* If part number is known ****

Use the NUMERICAL INDEX in Section III to find Part Number, which is listed in alpha-numerical order.

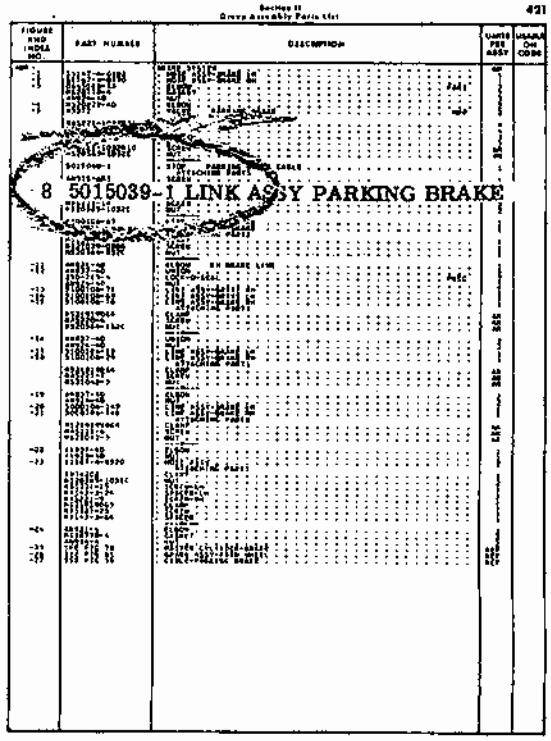
Example: The desired part is known to be 5015039-1

Find this number in the PART NUMBER COLUMN of the NUMERICAL INDEX. Opposite this number to the right, is 106-8. This is Figure 106 index 8 where the part is listed in the PARTS BREAKDOWN and as shown in the ILLUSTRATION.

See Examples for the listings of this part as described.

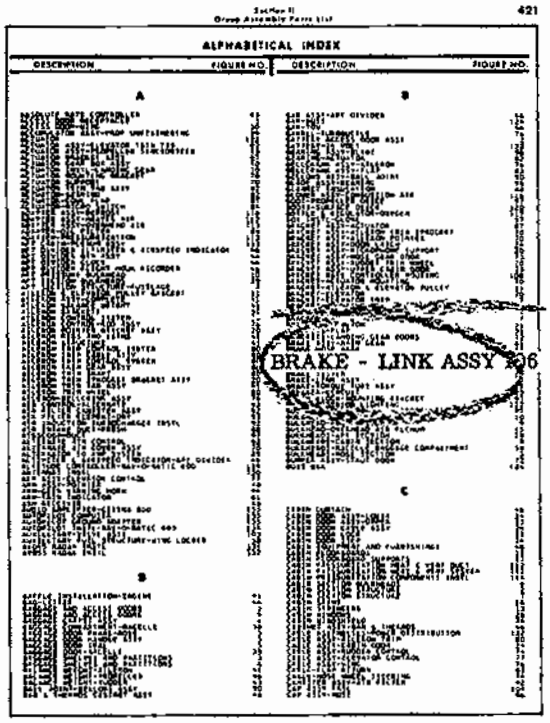


ILLUSTRATION



PARTS BREAKDOWN

.....how to use this book (CONT.)



ALPHABETICAL INDEX

* *if part number is not known*

The User should determine the description of the part by usage, or functional system to which it belongs. Then the appropiate figure may be located by using the Alphabetical Index.

Example: Desired part is PARKING BRAKE LINK ASSY used in the brake System.

Using the Alphabetical Index, find the Brake Link Assy, Figure 106. The Part Number is 5015039-1 as shown in Figure 106 index 8.

SECTION II

GROUP ASSEMBLY PARTS LIST

Part 2 Electronics

FOREWORD

The following section contains information on all the electronic equipment installations that have been offered on the Model 421, 421A, 421 Golden Eagle and 421 Executive Commuter.

The listing of electronic equipment is separated by the alphabetical arrangement of vendor names and under each name the various equipment offered.

On the following page is an alphabetical listing of the various systems. Indented under the main division, are the various vendor designations and the figures and index number where each may be found.
