LOG OF REVISIONS

Part Number	Date	Chapters Affected
105-590000-9	November 30, 1977	Original Issue
105-590000-9B	March 16, 1979	Reissue
105-590000-9C	October 2, 1981	Reissue
105-590000-9C1	January 4, 1982	Alpha-Numeric, Chapters 27 and 32
105-590000-9C2	November 19, 1982	Introduction, Alpha-Numeric, Chapters 11, 25, 27, 28, 32, 33, 39, 52, 53, 57, 71 and 76
105-590000-9C3	February 22, 1985	Introduction, Alpha-Numeric, Chapters 21, 23, 24, 25, 27, 28, 32, 33, 34, 36, 52, 53, 54, 55, 57, 61, 71, 72, 76 and 80

NOTE: A list of the effective pages will be found in the front of each chapter.

C3

Basic publications are assigned a part number which appears on the title page with the date of the issue. Subsequent revisions are identified by the addition of a revision code after the part number. A1 after a part number denotes the first revision to the basic publication, A2 the second, etc. Occasionally, it is necessary to completely reissue and reprint a publication for the purpose of obsoleting a previous issue and outstanding revisions thereto. As these replacement reissues are made, the code will also change to the next successive letter of the alphabet at each issue. For example, B for the first reissue, C for the second reissue, etc.

When ordering a handbook, give the basic number, and the reissue code when applicable, if a complete up-to-date publication is desired. Should only revision pages be required, give the basic number and revision code for the particular set of revision pages you desire.

INTRODUCTION

The purpose of this catalog is to provide a method for identifying and ordering spare parts for your BEECHCRAFT Duchess 76. See the following paragraphs for detailed information. To order replacement parts for electrical components, refer to the applicable BEECHCRAFT Wiring Diagram Manual.

ORGANIZATION

This illustrated parts catalog is prepared in accordance with the ATA (Air Transport Association) Specification No. 100 format.

The contents are organized at four levels as follows:

Group - identified by blue divider tabs. These are primary divisions of the manual that enable broad separation of content. Typical of this division is the separation between the Airframe Systems and the Power Plant.

Chapter - identified by yellow divider tabs. The various groups are broken down into major systems such as Air Conditioning, Electrical Power, Landing Gear, etc. The systems are arranged more or less alphabetically rather than by precedence or importance. They are assigned a number, which becomes the first element of a standardized numbering system. Thus, the element "28" of the number 28-00-00 refers to the chapter "Fuel". Everything concerning the fuel system will be covered in this chapter.

Sub-Section - The major systems of an airplane are broken down into sub-sections, and are identified by the second element of the standardized numbering system. The number "40" of 28-40-00 identifies the indicating portion of the fuel system.

Unit - The individual units within a sub-section may be identified by the third element of the standard numbering

system, such as 28-40-01. The number "01" is assigned by the manufacturer and may, or may not, be used and will vary in usage.

APPLICATION

Any publication conforming to GAMA or ATA 100 format utilizes the same basic numbering system, even though some chapters may be omitted because they are not applicable to that airplane or publication. Thus, whether the publication is a Maintenance Manual, a Parts Catalog, or a Wiring Diagram Manual, a person requiring information concerning the fuel storage or fuel indicating portion of the fuel system would refer to Chapter 28, FUEL. The List of Pages and Table of Contents located at the beginning of the chapter provides a list of sub-sections and units covered within the chapter.

For example:

28-00	General
28-10	Storage (Tanks, cells, necks, caps instruments, etc.)
28-20	Distribution (Fuel lines, pumps, valves, controls, etc.)
28-30	Dump (If in-flight dumping system is installed, it would appear here.)
28-40	Indicating (Quantity, temperature, pressure etc., does not include engine fuel flow or pressure.)

Carrying this example further, fuel indication, fuel control panel, could be assigned the number 28-41-01.

B E E C H C R A F T
D U C H E S S 7 6
I L L U S T R A T E D P A R T S C A T A L O G

LIST OF EFFECTIVE REVISIONS

The List of Effective Revisions following the logo page of the manual lists the revisions currently effective for the manual.

NOTE

Neither Service Publications, Reissues, nor Revisions are automatically provided to the holders of this manual. For information on how to obtain "Revision Service" applicable to this manual, consult a BEECH-CRAFT Aero or Aviation Center or International Distributor or Dealer, or refer to the latest revision of BEECHCRAFT Service Bulletin No. 2001.

ATA-100 SYSTEM - CHAPTER INDEX GUIDE

The ATA-100 System-Chapter Index Guide is a listing of the Groups, Chapters, Sub-Sections and Units which are applicable to this manual. The Chapter Index Guide is located in and is part of this Introduction.

ALPHABETICAL INDEX

The Alphabetical Index is a listing of component items or systems and the Chapter, Sub-Section and Unit in which they can be located. The Alphabetical Index is located in and is part of this Introduction.

ALPHA-NUMERIC INDEX

The Alpha-Numeric Index, contained in volume one only, is a complete alpha-numerical listing in tabular form of each part number listed, except those identified as attaching parts. Parts common to more than one chapter or assembly will be listed once for each time the part appears in order to reflect the different chapters, sub-sections, etc.

The Alpha-Numeric Index follows this Introduction.

LIST OF PAGES AND TABLE OF CONTENTS

The List of Pages and Table of Contents following each chapter divider tab, lists the issue date of each page that is effective for that chapter, the titles and, if applicable, the serial effectivity of the unit(s) covered in that chapter.

ILLUSTRATED PARTS LIST

The Illustrated Parts List consists of installations broken down into assemblies, sub-assemblies, detail parts, and attaching parts. A separation symbol (---*---) follows the listing of attaching parts to distinguish them from the assembly breakdown.

If two assemblies are made up of a majority of identical parts, or the assemblies are opposite, i.e., left and right hand, the assemblies are listed together with their detail parts listed as common for both assemblies. In this case only the left or right hand part, but not both, is indexed and illustrated, with the difference between left and right hand parts noted in the description column. The Units Per Assembly column indicates the number of detail parts required per assembly, NP indicates "Non Procurable" and AR indicates "As Required". The notation "(See Chapter)" indicates that this assembly and its detail parts are illustrated and broken down in another chapter or another sub-section and unit within the same chapter.

When a number is shown in the Usable On Code Column, refer to the Codes of Effectivity at the end of the listing of parts for that particular unit to determine airplane serial effectivity. Each unit has its own distinct coding, i.e., the code number denoting airplane serial effectivity for one unit may not be the same for another unit.

The above example from chapter 27 shows the indenture system used to indicate parts included in any given assembly. By this indenture system, parts shown in column 2 are component parts of the immediately preceding assembly in column 1; parts shown in column 3 are component parts of the immediately preceding assembly in column 2, etc., through column 7. As an example, if the 101-524092-3 Pushrod Assembly (see checked item in the above illustration) is ordered, it would include items 3 through 11. Note that items 1 and 2, bolts, washers and nuts (the attaching parts) are not a part of the pushrod assembly. There may be instances when a part number consists of more than 16 characters; in that case an asterisk (*) will appear at the end of the part number and the remainder of the number will be in the description field.

Consult the list of pages and table of contents in front of each chapter for the sub-section and unit in which the part is listed. Immediately preceding the listing of parts is an illustration (see step 1 in the example shown above). The item number adjacent to the illustrated part will appear in the listing of parts in the column entitled "Sub-Section, Unit and Item Number" (see step 2 above). Immediately to the right of the item number will be found the required part number.

BEECHCRAFT DUCHESS 76 ILLUSTRATED PARTS CATALOG

SUPERSEDED PART NUMBERS

Superseded Part Numbers will appear in the Alpha-Numeric Index with the letter "S" just to the left of the number. They should also appear in the description field of the parts list, for example "...BOLT/supersedes AN3-7/". In this instance, AN3-7 would be the superseded number.

REVISED LINES

Revised Lines in the Parts List are indicated by the letter "R" appearing just to the left of the part number column. The letter "R" indicates that the line has either been revised or added.

ATA 100 Page Block Guide

Pages are numbered consecutively for each unit beginning with page 1. The end of each unit is designated by the word "END".

An example:

28-10-01	Page 1	Title
28-10-01	Page 2	Illustration
28-10-01	Page 3	Text
		END
28-10-10	Page 1	Title

28-10-20	Page 4	Illustration
28-10-20	Page 5	Text
		END

HOW TO LOCATE A PART WHEN THE PART NUMBER IS KNOWN

If the part number is known and the Illustrated Parts List must be consulted for model applicability or description, refer to the Alpha-Numeric Index for the Chapter, Sub-Section, Unit, and Item Number of the required part. Refer to the example shown below.

101-524089-5 2-20-10-020

PART NUMBER CHAPTER, SECTION & ITEM NUMBER

WHEN the part number is known turn to the ALPHA-NUMERIC INDEX to locate the correct chapter, section & item number in the illustration.

D U C H E S S 7 6
I L L U S T R A T E D P A R T S C A T A L O G**

IMPORTANT! WHEN ORDERING PARTS

Always use the COMPLETE manufacturer's part number listed in the Part Number column. Be sure the "Airplane Serial Number" accompanies all spare parts orders.

Delays in filling spare parts orders often occur as a result of incomplete information being furnished with the original order, i.e., lack of model designation and airplane serial number. This information is provided on the serial placard located on the main access door frame, and indicated by check marks on the example below.

	
MANUFACTURED BY BEECH AIRCRAFT CORPORATION	
SERIAL	MODEL
T.C.	P.C. 8

NOTE

It shall be the responsibility of the owner/operator to ensure that the latest revision of publications referenced in this handbook are utilized during operation, servicing, and maintenance of the airplane.

NOTICE

Beech Aircraft Corporation expressly reserves the right to supersede, cancel and/or declare obsolete any part, part numbers, kits or publications that may be referenced in this manual without prior notice.

WARNING

This parts catalog has but one function; to facilitate ordering replacement parts for the BEECH-CRAFT Duchess 76.

Illustrations in this catalog are to be used only as aids in identifying parts and should not be used as a maintenance reference for reassembly.

Address all orders to:

Commercial Product Support
Beech Aircraft Corporation
Wichita Kansas 67201
U.S.A.

MICROFICHE/AEROFICHE

The General Aviation Manufacturers Association has developed a specification for microfiche and registered the name Aero-fiche for use by all GAMA Members. This manual is available on Aero-fiche or on paper, and either form of this manual may be obtained from BEECHCRAFT Aero or Aviation Centers and International Distributors or Dealers.

WARNING

Use only genuine BEECHCRAFT or BEECHCRAFT approved parts obtained from BEECHCRAFT approved sources, in connection with the maintenance and repair of Beech airplanes.

Genuine BEECHCRAFT parts are produced and inspected under rigorous procedures to insure airworthiness and suitability for use in Beech airplane applications. Parts purchased from sources other than BEECHCRAFT, even though outwardly identical in appearance may not have had the required tests and inspections performed, may be different in fabrication techniques and materials, and may be dangerous when installed in an airplane.

Salvaged airplane parts, reworked parts obtained from non-BEECHCRAFT approved sources, or parts, components, or structural assemblies, the service history of which is unknown or cannot be authenticated, may have been subjected to unacceptable stresses or temperatures or have other hidden damage, not discernible through routine visual or usual nondestructive testing techniques. This may render the part, component or structural assembly, even though originally manufactured by BEECHCRAFT, unsuitable and unsafe for airplane use.

BEECHCRAFT expressly disclaims any responsibility for malfunctions, failures, damage or injury caused by use of non-BEECHCRAFT approved parts.
